In a Longhorn galaxy far, far away brave volunteers joined the "dark side" by turning off all lights, unplugging personal electronics, and powering down computers.

On October 30, 7154 KWH reduction was achieved. A total of 178 participants turned off their lights.

What was turned off?
- 6255 lights
- 139 computers
- 251 monitors
- 225 other devices

This equates to 6.1 months of electricity for the average Texas home.
